PROFESSIONAL SUMMARY

Computer Science graduate (M.Sc., Blekinge Institute of Technology, expected November 2026) with experience in fullstack development, machine learning, and cloud technologies. Experienced in building web applications, developing AI-enabled solutions, and deploying applications using AWS. Strong problem-solving and analytical skills with an interest in software development, machine learning, and cloud engineering.

EDUCATION

M.Sc. in Computer Science, Blekinge Institute of Technology, Sweden *Sept 2024 - Nov 2026*

- 87 higher education credits completed.
- Master's thesis: Federated learning for reliable diabetes prediction, machine learning, deep learning, and probability calibration.

B.Sc. in Computer Science, Blekinge Institute of Technology, Sweden *Aug 2023 - June 2024*

TECHNICAL SKILLS

Programming: Java, Python, C++, C, SQL, R, JavaScript
Frontend & Mobile: Flutter, UI development
Cloud & DevOps: AWS EC2, RDS, S3, multi-tier deployment, cloud architecture
Machine Learning & AI: Scikit-learn, TensorFlow, Keras, XGBoost, Random Forest, LSTM, SVM, NLP, deep learning
Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, REST APIs
Security & Architecture: Threat modelling, LLM security, microservices, CI/CD
Soft Skills: Team collaboration, technical writing, analytical problem-solving, English and Swedish communication

KEY PROJECTS & ACADEMIC EXPERIENCE

Multi-Tier Web Application Deployment on AWS *BTH Academic Project 2024*

- Deployed a scalable multi-tier application using AWS EC2, RDS, and S3, integrating frontend, backend, and database layers.

Text2Image Mobile Application *BTH Academic Project 2024*

- Developed a Flutter application that converts text descriptions into AI-generated images and improved the user experience iteratively.

Threat Modelling & Risk Analysis for LLM Architecture *BTH Academic Project 2024*

- Conducted threat modelling for an LLM system, identified vulnerabilities, and developed security mitigation strategies.

EV Charging Optimization - Intelligent Decision Support *BTH Academic Project 2024*

- Designed predictive models for multi-horizon EV charging schedules, balancing energy demand, efficiency, and sustainability.

Cryptocurrency & Stock Market Price Prediction *BTH Academic Project 2024*

- Compared Random Forest, XGBoost, Gradient Boosting, SVM, and LSTM using CRISP-DM and time-series feature engineering; evaluated with RMSE and MAE.

Software Maintainability Analysis using GQM Framework *BTH Academic Project 2024*

- Analysed software maintainability using LCOM, CBO, RFC, WMC, DIT, and LOC metrics and identified technical-debt hotspots.

Accident Severity Prediction & Spam Detection *BTH Academic Project 2023-2024*

- Built supervised learning classifiers for safety analytics and text classification, evaluated using accuracy, precision, recall, and F1-score.

PUBLICATIONS & RESEARCH

Master's Thesis

A Federated Learning Approach for Reliable Diabetes Prediction*:*
Comparative Analysis of Machine Learning and Deep Learning Models with Probability Calibration *Mar–Sep 2026*

- Compared centralized, local-only, and federated learning under IID and non-IID data distributions.
- Investigated probability calibration using sigmoid and isotonic calibration to improve prediction reliability.
- Applied SHAP-based explainability to evaluate model explanation consistency.

Analyzing Rule-Based Models in Personal Loan Credit Scoring *Jan–June 2024*

- Compared RIPPER and CN2 algorithms for financial risk assessment using accuracy, precision, recall, and F1-score.

INTERNSHIP EXPERIENCE

AI Intern, FLY Rank AI, Sweden *July 2026 - August 2026*

- Developed Python applications for predictive analytics and intelligent data processing.

- Built and evaluated Scikit-learn machine learning models.
- Applied feature engineering and preprocessing techniques to improve model performance.

Python Programming Intern, AICTE *May - June 2023*

- Completed a structured Python programming internship focused on scripting and automation.

LANGUAGES

English - Professional Swedish - Conversational Telugu - Native

AVAILABILITY

Available to join from August 2026.
